**Comments concerning proposed rulemakings**

Any oil and gas production activity should be circular regarding use of resources, especially water. There is no reason this industry can't manage to recycle and reuse every ounce of water it needs to produce oil and gas. This industry is mature enough to have figured it out how to do it by now and should be aware that one day it too, like all of us, will have to pay a lot of money to procure good water. Do it now and save yourself.
